

Java Programming Assessment - Part 2

1. Which of the following is considered a marker interface in Java?

- a. `java.io.Serializable`
- b. `java.lang.Runnable`
- c. `java.lang.Comparable`
- d. `java.util.concurrent.Callable`

2. What is the size of the char data type in Java?

- a. 8 bits
- b. 16 bits
- c. 32 bits
- d. 64 bits

3. Which method is used to begin the execution of a thread?

- a. `run()`
- b. `start()`
- c. `init()`
- d. `execute()`

4. Which block is always executed regardless of whether an exception is thrown or caught?

- a. `try`
- b. `catch`
- c. `finally`
- d. `throw`

5. Which of the following is NOT a valid identifier (variable name) in Java?

- a. _myVariable
- b. \$myVariable
- c. 123myVariable
- d. myVariable123

6. Which class from the Java Collections Framework provides a resizable array implementation?

- a. ArrayList
- b. LinkedList
- c. HashSet
- d. TreeSet

7. If no access modifier is specified for a class member, what is its default visibility?

- a. public
- b. private
- c. protected
- d. package-private

8. Which of the following is NOT an Object-Oriented Programming (OOP) principle?

- a. Polymorphism
- b. Inheritance
- c. Compilation
- d. Encapsulation

9. Which design pattern restricts the instantiation of a class to exactly one object?

- a. Factory
- b. Singleton
- c. Builder
- d. Observer

10. Which keyword is used to allocate memory for a new object in Java?

- a. new
- b. malloc
- c. alloc
- d. create

Answer Key

Q1	Q2	Q3	Q4	Q5
a	b	b	c	c

Q6	Q7	Q8	Q9	Q10
a	d	c	b	a
